REGULATIONS

COMMISSION IMPLEMENTING REGULATION (EU) 2016/323

of 24 February 2016

laying down detailed rules on cooperation and exchange of information between Member States regarding goods under excise duty suspension pursuant to Council Regulation (EU) No 389/2012

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EU) No 389/2012 of 2 May 2012 on administrative cooperation in the field of excise duties and repealing Regulation (EC) No 2073/2004⁽¹⁾, and in particular, Article 9(2), Article 15(5) and Article 16(3) thereof,

After consulting the European Data Protection Supervisor;

Whereas:

- (1) A computerised system is principally to be used for the exchanges of information provided for under Articles 8, 15 and 16 of Regulation (EU) No 389/2012 regarding goods under excise duty suspension. It is therefore necessary to lay down the structure and content of the mutual administrative assistance documents that convey that information.
- (2) In order to allow for effective control of goods under excise duty suspension, the requesting authority should be able to request the history of a movement of goods under excise duty suspension within the Union from another competent authority by supplying the administrative reference code of the relevant electronic administrative document, assigned in accordance with Article 21(3) of Council Directive 2008/118/EC⁽²⁾. Requested authorities should be able to provide automatic responses to such requests. The response should include all electronic documents and other information exchanged in accordance with the provisions of Articles 21 to 25 of Directive 2008/118/EC.
- (3) Where the requesting authority does not know the administrative reference code of the electronic administrative document under the cover of which a movement of goods under excise duty suspension within the Union takes place, that requesting authority should be able to obtain the relevant administrative reference code by supplying other relevant information concerning the movement.
- (4) Some investigations of trader compliance with the provisions of Chapter III and Chapter IV of Directive 2008/118/EC require the collection of information that can only be found outside of the computerised system. Therefore the computerised system should, for the purposes of finding such information, support the transmission of requests for administrative cooperation and of responses to such requests. The computerised system should also support the sending of legally justified refusals by requested authorities.

⁽¹⁾ OJ L 121, 8.5.2012, p. 1.

⁽²⁾ Council Directive 2008/118/EC of 16 December 2008 concerning the general arrangements for excise duty and repealing Directive 92/12/EEC (OJ L 9, 14.1.2009, p. 12).

- (5) The computerised system should provide standard formats for mutual administrative assistance documents to support the mandatory exchange of information where an irregularity or an infringement of legislation on excise duties has occurred, or is suspected to have occurred.
- (6) It should be ensured that the computerised system is used for information that is optionally exchanged in the same way as for information that is exchanged on a mandatory basis. The same mutual administrative assistance documents should be used in both cases.
- (7) It should be possible for the competent authorities of the Member States to request and receive feedback by uniform means on the follow-up action taken on the basis of information that has been exchanged.
- (8) Detailed rules should be laid down allowing for the exchange of information for the purposes of administrative cooperation when the computerised system is not available and for the recording of that information in the computerised system when it becomes available again.
- (9) The situations under which Member States should use fall-back mutual administrative assistance documents for the mandatory exchange of information should be established.
- (10) The measures provided for in this Regulation are in accordance with the opinion of the Committee on Excise Duty,

HAS ADOPTED THIS REGULATION:

ANNEX I

STRUCTURE OF COMMON MESSAGES

Electronic messages used for the purpose of information exchange concerning excise goods under duty suspension

EXPLANATORY NOTES

- (1) The data elements of the electronic messages used for the purpose of information exchange concerning excise goods under duty suspension using the computerised system referred to in Article 21(2) of Directive 2008/118/EC and in Article 2(17) of Regulation (EU) No 389/2012 are structured in data groups and, where applicable, data subgroups. Details regarding the data and their use are presented in the tables of this Annex, in which:
- (a) column A sets out the numeric code (number) attributed to each data group and data subgroup; each subgroup follows the sequence number of the data (sub)group of which it forms part (for example: where the data group number is 1, one data subgroup of that group is 1.1 and one data subgroup of that subgroup is 1.1.1);
 - (b) column B sets out the alphabetic code (letter) attributed to each data element in a data (sub)group;
 - (c) column C identifies the data (sub)group or data element;
 - (d) column D indicates for each data (sub)group or data element a value indicating whether the insertion of the corresponding data is:
 - ‘R’ (required), meaning that the data must be provided; when a data (sub)group is ‘O’ (optional) or ‘C’ (conditional), data elements within that group can still be ‘R’ (required) when the competent authorities of the Member State have decided that the data in that (sub)group must be completed or when the condition for the enclosing data (sub)group is fulfilled,
 - ‘O’ (optional), meaning that the insertion of the data is optional for the person submitting the message (the consignor or consignee) except where a Member State has stipulated that the data are required in accordance with the option provided for in column E for some of the optional data (sub)groups or data elements,
 - ‘C’ (conditional), meaning that the use of the data (sub)group or data element depends on other data (sub)groups or data elements in the same message;
 - (e) column E sets out the condition(s) on which the insertion of data is conditional, specifies the use of the optional data where applicable and indicates which data must be provided by the competent authorities;
 - (f) column F provides explanations, where necessary, concerning the completion of the message;
 - (g) column G indicates:
 - for some data (sub)groups a number followed by the character ‘x’ indicating how many times the data (sub)group can be repeated in the message (default = 1),
 - for each data element, except for data elements indicating the time or date, the characteristics identifying the data type and the data length; the codes for the data types are as follows:
 - a* alphabetic,
 - n* numeric,
 - an* alphanumeric.

The number following the code indicates the admissible data length for the data element concerned. The two dots before the length indicator mean that the data have no fixed length, but can have up to a number of digits, as specified by the length indicator. A comma in the data length means that the data can hold decimals, the number before the comma indicating the total length of the attribute, and the number after the comma indicating the maximum number of digits after the decimal point.

For data elements indicating the time or date, the mention 'date', 'time' or 'dateTime' means that the date, the time or the date and time must be given using the ISO 8601 standard for representation of dates and time.

(2) The following abbreviations are used in the tables of this Annex:

- e-AD: electronic administrative document,
- ARC: administrative reference code,
- SEED: system for exchange of excise data (the electronic database referred to in Article 19(1) of Regulation (EU) No 389/2012),
- CN Code: Combined Nomenclature code,
- MRN: movement reference Number,
- LRN: local reference number,
- LNG: language,
- VAT: value added tax,
- ACO: administrative cooperation.

ANNEX II

Lists of codes

Code list 1: Follow-up correlation ID

Field	Content	Field type	Examples
1	Year	Numeric 2	5
2	Identifier of the MS where the message was initially submitted	Alphabetic 2	ES
3	Free nationally assigned, code	Alphanumeric 21	ARC
4	Complement	Alphanumeric 3	123

Field 1 is last two digits of year.

Field 2 is taken from the list of <MEMBER STATES> (see Code list 3 in Annex II to Regulation (EC) No 684/2009).

Field 3 must be filled with a nationally assigned identifier. In certain cases, for the Follow-Up Correlation ID it can be an ARC.

Field 4 gives a complement to field 3 to make together a unique identifier (for example, in the case of Follow-Up Correlation ID where several follow-up messages deal with the same ARC.)

Code list 2: Event report number/Control report reference

Field	Content	Field type	Examples
1	Identifier of the MS where the report was initially submitted	Alphabetic 2	ES
2	Nationally assigned, unique code	Alphanumeric 13	2005YTE17UIC2
3	Check digit	Numeric 1	9

Field 1 is taken from the list of <MEMBER STATES> (see Code list 3 in Annex II to Regulation (EC) No 684/2009)

Field 2 must be filled with a unique identifier per report. The way this field is used is under MSAs' responsibility, but each report must have a unique number. It is possible, but not mandatory, that it contains the year when the report was initially submitted (as suggested in the example).

Field 3 gives the check digit for the whole identifier, which will help detect an error when keying this identifier.
