COMMISSION DELEGATED REGULATION (EU) 2024/296

of 9 November 2023

amending Delegated Regulation (EU) 2022/1636 as regards the messages concerning excise goods being exported under suspension of excise duty

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Directive (EU) 2020/262 of 19 December 2019 laying down the general arrangements for excise duty (¹), and in particular Article 29(1) thereof,

Whereas:

(1)   Article 21(3) of Directive (EU) 2020/262 requires the competent authorities in the Member State of export to verify the data of the electronic administrative document against the export declaration and to notify any inconsistencies between the electronic administrative document and the export declaration to the Member State of dispatch by means of the computerised system referred to in Decision (EU) 2020/263 of the European Parliament and of the Council (²) ('the computerised system').

(2)   Article 21(5) of Directive (EU) 2020/262 requires the competent authorities of the Member State of export to notify the competent authorities of the Member State of dispatch in the event that the goods are no longer to be taken out of the customs territory of the Union.

(3)   Pursuant to Article 29(1) of Directive (EU) 2020/262, the Commission is to establish the structure and content of such notifications.

(4)   Commission Delegated Regulation (EU) 2022/1636 (³) establishes the structure and content of the documents exchanged in the context of movement of excise goods but does not establish the structure and content of the documents referred to in Article 21(3), (4) and (5) of Directive (EU) 2020/262. Delegated Regulation (EU) 2022/1636 should therefore be amended accordingly.

(5)   Article 27(2) of Directive (EU) 2020/262 requires the use of a fallback document where the notification that the goods will no longer be taken out of the territory of the Union in accordance with Article 21(5) cannot be completed because the computerised system is unavailable. In accordance to Article 29(1) of Directive (EU) 2020/262, the Commission is to establish the content and structure of the fallback documents. Delegated Regulation (EU) 2022/1636 should therefore be amended accordingly to lay down the content of this fallback document.

(6)   The excise computerised system is expected to be interfaced with the EU Automated Export System by 13 February 2024. In accordance with Article 54 of Directive (EU) 2020/262, the notifications referred to in Article 21(5) of Directive (EU) 2020/262 may be made by means other than the computerised system until 13 February 2024. As this Regulation concerns procedures for the movement of excise goods under duty suspension that are exported outside the Union, it should apply from 13 February 2024,

HAS ADOPTED THIS REGULATION:

(³)   Commission Delegated Regulation (EU) 2022/1636 of 5 July 2022 supplementing Council Directive (EU) 2020/262 by establishing the structure and content of the documents exchanged in the context of movement of excise goods, and establishing a threshold for the losses due to the nature of the goods (OJ L 247, 23.9.2022, p. 2).

ANNEX I

'ANNEX I

Messages used for the purpose of movements of excise goods under suspension of excise duty or previously released for consumption in the territory of one Member State and moved to the territory of another Member State to be delivered there for commercial purposes

EXPLANATORY NOTES

1. The data elements of the electronic messages (¹) exchanged in accordance with Articles 20 to 25 and Articles 36 and 37 of Directive (EU) 2020/262 shall be structured in data groups and, where applicable, data subgroups as set out in Tables 1 to 9 of this Annex. The columns of Tables 1 to 9 shall contain the following information:

   (a) column A: the numeric code (number) attributed to each data group and data subgroup. Each subgroup follows the sequence number of the data (sub)group of which it forms part (for example: where the data group number is 1, one data subgroup of this group is 1.1 and one data subgroup of this subgroup is 1.1.1);

   (b) column B: the alphabetic code (letter) attributed to each data element in a data (sub)group;

   (c) column C: an identification of the data (sub)group or data element;

   (d) column D: a value for each data (sub)group or data element indicating whether the insertion of the corresponding data is:

       (i) required ("R"), meaning that the data must be provided. When a data (sub)group is optional ("O") or conditional ("C"), data elements within that group can still be "R" when the competent authorities of the Member State have decided that the data in this (sub)group must be completed or when the condition applies;

       (ii) optional ("O"), meaning that the insertion of the data is optional for the person submitting the message (the consignor or consignee) except where a Member State has stipulated that the data are required in accordance with the option provided for in column E for some of the optional data (sub)groups or data elements;

       (iii) conditional ("C"), meaning that the use of the data (sub)group or data element depends on other data (sub) groups or data elements in the same message;

       (iv) dependent ("D"), meaning that the use of the data (sub)group or data element depends on a condition which cannot be checked by the computerised system, as provided for in columns E and F;

   (e) column E provides the condition(s) for data whose insertion is conditional, specifies the use of the optional and dependent data where applicable and indicates which data must be provided by the competent authorities;

   (f) column F provides explanations, where necessary, concerning the completion of the message;

   (g) column G provides:

       (i) for some data (sub)groups a number followed by the character "x" indicating how many times the data (sub) group can be repeated in the message (default = 1);

       (ii) for each data element, except for data elements indicating the time and/or the date, the characteristics identifying the data type and the data length. The codes for the data types are "a" for alphabetic, "n" for numeric and "an" for alphanumeric.

(¹) Where, in accordance with Article 9 of this Regulation, certain requirements of this Annex apply to the fallback documents referred to in Articles 26, 27, 37 and 38 of Directive (EU) 2020/262, the explanatory notes shall apply *mutatis mutandis* to those documents.

The number following the code provides the admissible data length for the data element concerned. The optional two dots before the length indicator mean that the data have no fixed length, but can have up to a number of digits, as specified by the length indicator. A comma in the data length means that the data can hold decimals, the digit before the comma provides the total length of the attribute, the digit after the comma provides the maximum number of digits after the decimal point;

(iii) for data elements indicating the time and/or date, the mention "date", "time" or "dateTime", meaning that the date, the time or the date and time must be given using the ISO 8601 standard for representation of dates and time.

2. The following abbreviations are used in Tables 1 to 9:

(a) "e-AD": electronic administrative document;

(b) "e-SAD": electronic simplified administrative document;

(c) "ARC": administrative reference code;

(d) "SEED": the System for Exchange of Excise Data referred to in Article 19(1) of Council Regulation (EU) No 389/2012 (²);
