<b>Object name</b>	<b>Availability</b>
Object type	Requirement
Reference ID	PUS_AVA_0001
Description	TA must support applications that have wide range of availability requirements. For both applications towards Customs Officer and Economic Operator, the QoS (Quality of Service) is expressed in availability during business hours:

EU Customs Functional Requirements BPM Report for UCC PoUS System
ANNEX 7: LIST OF AMENDMENTS

	<ul style="list-style-type: none"> <li>• All days of the year including public holidays;</li> <li>• Business Hours: 07:00 – 20:00 CET.</li> </ul> <p>All maintenance activities will be planned and announced well in advance. During this Service Window, the minimal uptime service availability is 99.4% per rolling 3 months. The maximum unplanned downtime is 13 hours and to ensure integrity, the Recovery Point Objective (RPO) is equal or less than 1 hour. In case of unavailability, the Recovery Time Objective (RTO) is less than 1 week and Recovery Point Objective (RPO) is equal or less than 1 day, where the RTO is the targeted duration of time and a service level within which a business process must be restored after a disaster (or disruption) in order to avoid unacceptable consequences associated with a break in business continuity. The above requirements are aligned with the Bronze Service Availability Level.</p>

<b>Object name</b>	<b>Horizontally Scaled</b>
Object type	Requirement
Reference ID	PUS_SCA_0001
Description	The CDCO must be architected to horizontally scale including increased number of users and increased transaction and data volume without changing technical architecture (the underlying infrastructure architecture will probably change). The amount of messages exchanged via CCN2 increases 30% annually. This statement does not imply that the architecture must support 30% annual increase because messages are distributed across applications, environments, etc. But it indicates that the architecture must be scalable.
