**Subject:** New IP whitelist request for TAPAS CONF (new IP: 147.67.18.44)

*Dear ICS2 National Project Managers,*

*Following the below mass mail sent on April 2024 for this topic, we would like to inform you that the update on TAPAS CONF configuration will be implemented today 13/08.*

*Therefore, we kindly ask you to inform the EOs that are operating in ICS2 Conformance, that the source IP address from which TAPAS is sending messages (**in Conformance**) will be changed from the (existing) IP: 147.67.18.4 to the new IP: **147.67.18.44***

*Each EO should whitelist in their Firewall this new source IP (**147.67.18.44**) **before the end of April 2024**, otherwise the change might cause downtime. We recommend them to have both IPs (old: 147.67.18.4 – new: **147.67.18.44**) permitted in their Firewall, so the communication won't be impacted by the switch. After the switch (to **147.67.18.44**) is completed, they can remove the old IP from the Firewall.*

*After the split from the common PROD/CONF source IP address (147.67.18.4), each environment will have a dedicated IP, as per below:*

*Production: 147.67.18.4*

*Conformance: 147.67.18.44*

*We remain at your disposal for any further clarification.*

*Kind regards,*

*ITSM3 TES – ICS2 Team*
